Hiring Team

Dear Hiring Team,

I am a Computer Engineering student at Universitat Politecnica de Valencia and Technical Lead at Auro AI, after a year as AI & Back-End Developer at Grupo Educativo CEU. I am writing to express my interest in opportunities where I can contribute to applied AI and software engineering projects with real impact.

In my current role at Auro AI, I lead the technical development of a conversational AI product, owning the back-end architecture of a TypeScript monorepo on PostgreSQL, Docker and Google Cloud Platform, and setting the engineering standards the team works by. Before that, at Grupo Educativo CEU, I designed and deployed production AI solutions, including GPT-powered assistants and retrieval-augmented generation (RAG) pipelines connected to institutional data. Alongside this work, I continue strengthening my engineering foundation through projects in machine learning, NLP, and scalable software design.

I would value the opportunity to bring this mix of academic rigor, practical AI development, and strong execution to your team. Thank you for your time and consideration. I would be glad to discuss how I can contribute.

Sincerely,

Ignacio Diago Valeta
