EDUCATION

Universitat Politècnica de Valencia (UPV)

Valencia, Spain

Computer Engineer, Computing Specialization

2026

- Focused on algorithms, data structures, parallel computing, artificial intelligence, machine learning, mathematical foundations, and software architecture
- Additional certifications in Python for Data Science, Linux Fundamentals, SQL and R for Data Analysis, and Mathematical Foundations for Machine Learning

EXPERIENCE

Technical Lead (Part-time)

Jun. 2026 – Present

Auro AI

Valencia, Spain

- Lead the technical development of an AI assistant that reads energy and telecom bills over WhatsApp and switches users to the best tariff available in Spain
- Own and evolve the back-end architecture of a TypeScript monorepo (REST API, conversational agent, internal CRM) running on PostgreSQL, Docker, pm2 and Google Cloud Platform
- Act as the technical reference for the team: code review, engineering standards, and definition of development best practices

Inditex Tech Ambassador

Apr. 2026 – Present

Inditex

Spain

- Selected for a university STEM talent program connecting students with Inditex's global technology teams
- Participate in mentoring, networking, and exclusive technology events focused on applied engineering and innovation

AI & Back-End Developer

Oct. 2025 – Present

Grupo Educativo CEU

Valencia, Spain

- Develop and deploy GPT-CEU, a custom generative AI assistant using OpenAI/Azure APIs and RAG pipelines to optimize academic and administrative workflows
- Connect language models with institutional data sources to provide real-time information to staff and students
- Build back-end services and document AI automations for production educational operations

Museum Guide & Technical Workshop Instructor

Feb. 2025 – Jun. 2025

Museo de Informatica, Universitat Politècnica de Valencia

Valencia, Spain

- Designed and delivered technical workshops on robotics, cryptography, and programming for diverse audiences
- Led guided visits on the history of computing, adapting technical explanations to students and general visitors

Private Tutor

Jan. 2022 – Jan. 2025

Superprof

Valencia, Spain

- Provided personalized instruction in mathematics, physics, and technical drawing for secondary and pre-university students

PROJECTS

MonkeyGrab / Local On-Premises RAG System | *Ollama, ChromaDB, LlamaIndex, Flask, React*

2026

- Built a privacy-focused multilingual RAG system for PDFs as a final degree project, without dependency on external APIs
- Implemented hybrid semantic and lexical retrieval with a Flask back end and React web interface

OCR-to-CRM Automation Pipeline | *Azure Functions, Document Intelligence, GPT*

2026

- Developed a serverless Azure pipeline that transforms handwritten academic enrollment forms into CRM records
- Combined OCR extraction, structured validation, and GPT-based reasoning; deployed in production at CEU

Interactive Portfolio Web | *React, TypeScript, Tailwind CSS, Conversational UI*

2026

- Built an interactive personal portfolio that presents technical projects through a conversational web experience
- Designed and deployed a responsive interface to centralize professional links, AI work, and software engineering projects

Dataset Creator | *Python, PDF Processing, JSONL, QA Generation*

2026

- Created a reproducible local pipeline for generating supervised QA datasets from PDFs with language detection and quality controls

TECHNICAL SKILLS

Generative AI, LLMs & NLP: RAG, fine-tuning, PEFT/QLoRA, LangChain, LlamaIndex, Mastra, Vertex AI, Ollama, ChromaDB, pgvector, Hugging Face Transformers, prompt engineering, RAGAS, BERTScore

Machine Learning & Computer Vision: PyTorch, TensorFlow, Keras, Scikit-learn, Vision Transformers, OpenCV, MediaPipe

Data Pipelines, Document AI & DevOps: Azure Document Intelligence, PDF parsing, OCR structuring, data analysis, MLOps, Weights & Biases, Git, Linux, Docker, pm2, CI/CD with GitHub Actions

Cloud, Back End & Front End: Google Cloud Platform, Azure Functions, Azure Blob Storage, Node.js, Flask, REST APIs, PostgreSQL, Next.js, React, TypeScript, Tailwind CSS

Programming Languages: Python (advanced), JavaScript/TypeScript, SQL, R, C

Languages Spoken: Spanish (native), English (full professional proficiency, Cambridge B2), Valencian (native, GVA certified)
